RWA CREDIT RAIL · CREDIT PASSPORT · SEOUL

Credit for the cash flow banks can't read.

The bank prices collateral. RAIL prices verified cash flow.

RAIL verifies export receipts, platform payouts and patents as on-chain evidence, issues a **Credit Passport** — evidence, score, limit, APR — and tokenizes approved receivables as **ERC-3643 RWAs** on Base. Four agents collect, verify, underwrite and broker; a deterministic engine computes every number.

AGENT CREW

SCOUT	Wallets, platforms, customs, patents
VERIFIER	Cross-checks self-reports vs on-chain
UNDERWRITER	Computes score, grade, limit, APR
BROKER	Issues the receivable, matches LPs

Numbers are computed by a deterministic engine; LLMs never invent them.

RAIL is a demo. Not a financial service. Credit decisions, receivable issuance, ERC-3643 tokens, investor records and funding percentages are simulated; applicants are constructed personas. Market data from public APIs.
